

# RISHIKA BHANUSHALI

Seattle WA, United States

Website : [rb-rishika](http://rb-rishika) | +1 848-234-4756 | [rishikabhanushali@gmail.com](mailto:rishikabhanushali@gmail.com) | Github: [rb-rishika](https://github.com/rb-rishika) | LinkedIn: [rishika-bhanushali](https://www.linkedin.com/in/rishika-bhanushali)

## SUMMARY

Full-stack engineer with a background in AI/ML and enterprise web systems, experienced in building scalable React/Next.js applications

## EDUCATION

|                                                                                                                                                                                           |                           |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| <b>Rutgers University- New Brunswick</b>   Master of Science: Computer Science                                                                                                            | <b>Sep 2021- May 2023</b> |
| <b>Relevant Coursework:</b> <i>Data Structures, Artificial Intelligence, Databases, Brain Inspired Computing, Computer Vision, Mathematical Foundation of Data Science, Deep Learning</i> | <b>CGPA:</b> 3.97/4       |
| <b>University of Mumbai</b>   Bachelor of Engineering: Computer Engineering                                                                                                               | <b>Jul 2016 -Jul 2020</b> |
| <b>Relevant Coursework:</b> <i>Operating Systems, Software Engineering, Data Mining, Algorithms</i>                                                                                       | <b>CGPA:</b> 8.59/10      |

## TECHNICAL SKILLS

- **Programming Languages** : Java, Typescript, Python, JavaScript, C++,
- **Databases** : MySQL, PostgreSQL, MongoDB, Apache Spark
- **Miscellaneous** : AWS, REST APIs, Jenkins, Git, Figma
- **Web Technologies** : React, Node.js, Spring Boot, GraphQL, Flask, Jest, Cypress, Tailwind CSS, Next JS

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Starbucks Coffee Company</b>   <b>Seattle, WA</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>4 years</b> |
| <i>Engineer II</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                |
| <ul style="list-style-type: none"><li>• Built a reusable TypeScript component library (text-field, number-field, carousel, calendar) using Tailwind CSS and accessible Radix-style primitives, adopted across multiple product teams</li><li>• Established a comprehensive testing suite from scratch using Jest, React Testing Library, and Cypress, achieving 90% code coverage and significantly improving release reliability.</li><li>• Applied code-splitting and lazy-loading strategies that reduced bundle size by 60%, improving page load performance and UX.</li></ul> |                |
| <i>Graduate Engineer, Intern II</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <b>1 year</b>  |
| <ul style="list-style-type: none"><li>• Enhanced store search functionality by implementing advanced filters including geolocation-based search and Elasticsearch, improving result relevance across 80,000+ locations.</li></ul>                                                                                                                                                                                                                                                                                                                                                  |                |
| <b>BNP Paribas India Solutions</b>   <b>Mumbai, India</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <b>1 year</b>  |
| <i>Associate Software Engineer</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                |
| <ul style="list-style-type: none"><li>• Wrote quality scripts in PowerShell and batch to foster automation that decommissioned 260 existing scripts.</li><li>• Designed complex SQL stored procedures and employed to visualize data with Crystal Reports.</li><li>• Liaised with the users to understand the requirements and developed technical solutions to add/ fabricate features.</li></ul>                                                                                                                                                                                 |                |

## PERSONAL PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                            |
