EDUCATION

Rutgers University- New Brunswick Master of Science: Computer Science Relevant Coursework: Data Structures, Artificial Intelligence, Databases, Brain Inspired Computing, Computer Vision, Mathematical Foundation of Data Science, Deep Learning	Sep 2021- May 2023 CGPA: 3.97/4
University of Mumbai Bachelor of Engineering: Computer Engineering Relevant Coursework: Operating Systems, Software Engineering, Data Mining, Algorithms	Jul 2016-Jul 2020 GPA: 8.59/10

TECHNICAL SKILLS

- **Programming Languages** : Java, Typescript, Python, JavaScript, C++,
- **Databases** : MySQL, PostgreSQL, MongoDB, Apache Spark
- **Miscellaneous** : AWS, REST APIs, Jenkins, Git, Figma
- **Web Technologies** : React, Vue.js, Node.js, Spring Boot, GraphQL, Flask, Jest, Cypress, Tailwind CSS

WORK EXPERIENCE

Starbucks Coffee Company Seattle, WA <i>Engineer II</i> • Created custom web components such as text-field, number-field, carousel and calendar components for the application using TypeScript, MUI and Tailwind CSS. • Engineered the testing suite from scratch and achieved 90% testing coverage using Jest, React testing library and Cypress. • Worked on sustainment items like code splitting which reduced the bundle size by 60% and made the application faster • Aligned with designers, managers, and other developers to create solutions based on specific requirements for the software. Componentization and refinement of code over time for quality use.	May 2023-current
<i>Graduate Engineer, Intern II</i> • Owned store search page experience by creating filters enabling advanced filtering and searching using Elasticsearch. • Worked on UX for the team website using React JS by improving existing features and addition of new features from scratch.	May 2023-current
BNP Paribas India Solutions Mumbai, India <i>Associate Software Engineer</i> • Wrote quality scripts in PowerShell and batch to foster automation that decommissioned 260 existing scripts. • Liaised with the users to understand the requirements and developed technical solutions to add/fabricate features. • Designed complex SQL stored procedures and employed to visualize data with Crystal Reports.	Jul 2020-Jul 2021

PROJECTS & RESEARCH PUBLICATIONS

<u>Patient Activity Recognition System</u> Matlab • Developed a CNN-LSTM model to classify the activities using 33 keypoints. • Generated these keypoints by passing the animations from Mixamo by Adobe to mediapipe framework.	Sep 2022-Dec 2022
<u>Sketch to Face</u> Pytorch, Deep Learning • Modelled a Conditional Generative Adversarial networks with U-Net architecture to generate realistic photos with artistic sketches and ground truth as inputs.	Jan 2022-Apr 2022
<u>Smart Reader</u> Python, Raspberry Pi 3, Image Processing Issue: Volume 7 Issue 8, Aug 2020 Journal Name: International Research Journal of Engineering and Technology (IRJET) • Constructed Smart Reader by processing the input image using Local Mean-Gradient thresholding. The system converted the image to text and then speech which aided visually challenged people to hear out text. Tested the model for 78 languages. • Secured 1st place in Computer Engineering Department at Project Expo [Jul 2019-Jul2020].	Jun 2019-Mar 2020
<u>PathFinder</u> Java 13 • Implemented global search strategies such as Breadth First Search (BFS), Uniform Cost Search (UCS) and informed search strategies such as A* heuristic search to find optimal path from Source to destination overcoming the blockages. • Compared 4 directional A* agent and blindfolded agent and graphed an overlapping chart between the two to analyze it.	Sep 2021-Oct 2021

EXTRA-CURRICULAR ACTIVITIES

- **Event Management:** Led a workshop for 50+ students and taught Python 3.x, data cleaning, data visualization.
- **Social Service:** Volunteered at Thane Municipal Corporation's Bal Snehalya (orphanage) from May 2019 to Jul 2019.
- **Leadership:** Taught undergrad students' concepts of SQL, RDBMS, Database Design, Normalization (TA- CS336 RU)
- **Awards:** Bagged 'People's choice award' in Starbucks Six Hack week 2022.
